MINOR IN ELECTRICAL AND COMPUTER ENGINEERING
Offered and administered by the School of Electrical and Computer Engineering

EDUCATIONAL OBJECTIVES
The School of Electrical and Computer Engineering offers a minor to students who wish to complement their major by obtaining a background in Electrical and Computer Engineering. The minor offers the opportunity to study analog and digital circuits, signals and systems, electromagnetic, and additionally specialize at higher levels in one of several different areas such as circuit design, electronic devices, communications, computer engineering, networks, or space engineering.

REQUIRED COURSES

Any two of the following:
- ECE/ENGRD 2100 Introduction to Circuits for Electrical and Computer Engineers
- ECE 2200 Signals and Information
- ECE/ENGRD 2300 Introduction to Digital Logic Design

Any two of the following:
- ECE 3030 Electromagnetic Fields and Waves
- ECE/ENGRD 3100 Introduction to Probability and Random Signals (Previously ECE 320)
- ECE 3140/CS 3420 Computer Organization (or CS 3410 Systems Programming)
- ECE 3150 Introduction to Microelectronics
- ECE 3250 Mathematics of Signal and System Analysis

One other technical ECE lecture course at the 3000 level or above (minimum of 3 credits).

One other technical ECE lecture course at the 4000 level or above (minimum of 3 credits).

ACADEMIC STANDARDS
The grade point averages for courses used to satisfy the Electrical and Computer Engineering minor must meet the same requirements as the Electrical and Computer Engineering major; a grade of C- or better is required for every course in the minor and a cumulative GPA of at least 2.3 is required for all courses in the minor. At least 6 Electrical and Computer Engineering courses with a minimum of 3 credits each are required.
